

27.160.40

which kind of plastic is used on this gauge?

The Plastic is PBTGF 30%.

Full package includes: meter, connect cable & manual

Working voltage: 12V;

Measurement range: 8-16V;

Backlight: Red & Yellow;

Installation dimension: 52mm;

Bezel material ; stainless steel 316.

Needle: PC, white;

Shell: PBTGF 30%;

Working ampere: <180ma

Working temperature: -30 to +75°C

Connecting cable: 400mm length, AWG18

IP67, CE, ROHS

Could you tell me the precision of the instrument

For the fuel/water level meter, sewage level meter, oil/water temperature meter, oil pressure meter, voltage meter, trim meter, the precision is based on 6-8.

For the digital type of gauge, and also tacho meter, GPS speedometer, ampere meter, rudder angle meter and clock meter, the precision is ± 3 .

It is possible to use it with 5v electrical transformer ? are they compatible?

It couldn't use it with 5V electrical transformer, the working voltage is in 9-32V.
